WHY HOMEMATIC IP IS THE FIRST CHOICE: YOUR BENEFITS

Reliability
- ✔ Bidirectional communication:
  Confirmation of wireless commands for controlling the current status of all devices at all times
- ✔ Transmission based on 868 MHz frequency:
  No interferences caused by WLAN, Bluetooth, etc.
- ✔ Reliable communication in the entire house

Uncompromising security
- ✔ Encryption and authentication of data packets
- ✔ Application of standards that are used also for online banking
- ✔ Protected against attacks by third parties right from the beginning

Privacy policy
- ✔ Requires no personal data
- ✔ Server location in Germany: Strict compliance with German and European privacy policies

Battery operation
- ✔ Various battery operated devices enable smart home installations also in existing buildings
- ✔ Low energy consumption: Batteries usually need to be replaced only every two years
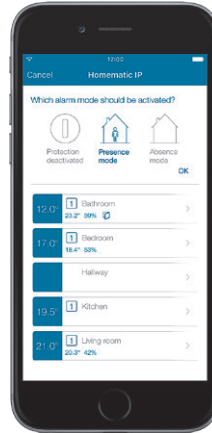

Experience
- ✔ eQ-3, manufacturer of Homematic IP, is the European market leader* in home automation
- ✔ More than thirty years of experience in developing wireless smart home products
- ✔ Over ten million of home control devices have been sold within the last five years

The devices are operated room-by-room via the app or on the device itself.

She is enjoying the comfort of her first smart home

✓ **Simply** installed.
✓ **Simply** expanded.
✓ **Simply** secure.

homematic IP

PRODUCTS

Access Point
Central element of the system. Connects the smartphone via the Homematic IP cloud with all Homematic IP devices. Connection to a standard router via LAN cable.

Radiator Thermostat
Controls the radiator according to the individual needs of the user. Without having to drain heating water or using special tools.

Window and Door Contact – optical
Detects opening and closing of windows and doors via the infrared-sensor.

Motion Detector with Brightness Sensor – indoor
Detects movements in indoor rooms and allows brightness- or time-dependent switching of lights. Can be used also for triggering alarms.

Presence Sensor
Reliably recognises the presence of people by detecting even smallest movements (e.g. hand movements on a keyboard).

Key Ring Remote Control – alarm
Activates/deactivates alarm functions and switches lights on or off. Also available as product variant with four individually configurable buttons.

Pluggable Switch
Switches connected loads, e.g. electric heaters or floor lamps, on and off.

Pluggable Switch and Meter
Additionally measures energy consumption, power, voltage and current.

Pluggable Dimmer – trailing edge
Switches and dims appropriate light sources such as for example LEDs or energy-saving lamps.

Alarm Siren
Warns about unauthorised entry and movements via loud acoustic signal and flashing device LED during activated alarm mode.

Wall Thermostat with Humidity Sensor
Measures the room temperature and humidity wherever you want. Compares the setpoint and actual temperature for controlling the radiator thermostats in the room.

Window Handle Sensor
Detects open, tilted or closed windows/ doors via the handle position.

Motion Detector with Brightness Sensor – outdoor
Detects movements and the brightness level around your home. Flexible adjustment of lens avoids unintended triggering caused by animals.

Smoke Alarm with Q label
Early warning if dangerous smoke gas is detected and operation as siren in alarm mode at the same time.

Remote Control – 8 buttons
Remote control for universal use with four individually configurable pairs of buttons, e.g. for switching of lights. With labelling field at the back side of the device.

Wall-mount Remote Control – 2 buttons
Switches the eco mode as well as lights on and off and serves as panic button within the security solution.

Wall-mount Remote Control – 6 buttons
Three freely configurable pairs of buttons for switching of connected devices. Can be placed freely in the room thanks to battery operation and radio communication.
